

## **CURRICULUM VITAE**

Prof. Anwar R. Padhani is an internationally recognized Oncological MRI radiologist at Mount Vernon Cancer Centre, London, UK. He is Professor of Cancer Imaging at the Institute of Cancer Research, London. He is the executive board and trustee of the International Cancer Imaging Society (ICIS). He is also co-chair of the International PI-RADS committee. He has been instrumental in introducing multiparametric prostate MRI into clinical practice in the UK, contributing to UK guideline development, quality assurance programs and training. He has contributed to international guidelines development including the ESUR/ACR prostate PI-RADS committee, the St.Gallen advanced prostate cancer consensus committee and the American Society of Clinical Oncology (ASCO) advanced prostate cancer guidelines.

He led efforts to standardize the use of whole body MRI for advanced prostate cancer for metastasis response assessments (MET-RADS; 2017) and for myeloma (MY-RADS 2019). He is a recognized cancer imaging expert looking after patients on a weekly basis. Prof. Padhani has a passion for teaching and has published chapters in 33 textbooks, 67 educational and scientific journal reviews in peer reviewed journals, and published 150 full scientific articles in peer reviewed journals, with over 17,000 publications reads and citations. Prof. Padhani has delivered over 400 lectures at scientific and educational meetings including several plenary talks. To his credit, he been awarded several education awards including outstanding teacher from the ISMRM, and honored RSNA educator awards. He is the recipient of the International Cancer Imaging Society 2017 Gold medal.
